Charles M. Schulz – Sonoma County Airport (STS)

Aircraft Noise Monthly Report

January 2022

About the Charles M. Schulz – Sonoma County Airport and Noise Abatement

The Airport operates as a self-supporting Enterprise Fund within the Department of Transportation and Public Works and under the jurisdiction of the Federal Aviation Administration (FAA). STS is both a general aviation facility, serving private planes and business jets, and is a commercial airline facility with scheduled air service. STS generates over \$1,300,000 annually in tax revenues, via its users, for Sonoma County and County School Districts.

The Airport's current Noise Abatement Program was established in 1988. STS also works within FAA guidelines, to encourage pilots and airlines to fly with consideration of our neighbors in mind. The Airport makes every effort to promote flight procedures that minimize aircraft noise while always maintaining safety as the highest priority. It is the FAA's sole responsibility to develop air traffic rules, assign the use of airspace, and control air traffic.

STS is working with our Aviation Commission and a community advisory group to re-write the Airport's Noise Abatement Guide and associated procedures (to be released in 2022). Using flight-tracking and noise management software, the Airport also provides monthly complaint reports to pilots and to airlines so that operators can use real data to update flight practices and fly friendly. As more data becomes available to STS staff, additional analysis is performed and included in monthly and annual reports.

STS Historical Operations

This Month's Operations

This Month's Noise Complaints At-A-Glance

- 54 Noise Complaints received
- 34 Individual Commenters
- 18 New Commenters
- 38 Correlated Operations*
- 16 Complaints that were non-specific, were regarding operations that did not include STS as the origin or the destination (not Airport-related), or were unable to be correlated to a flight track/aircraft

**An Operation is a departure from or an arrival to the Airport. Complaints may be correlated to more than one Operation or may not be correlated to an Operation.*

The Airport received 22 more complaints in January than in December. There were 18 new commenters this month. One of the new commenters lives in Santa Rosa, fourteen in Sebastopol, and three in Windsor. 12 of the 34 individual commenters live within five nautical miles of STS, including 2 of the new commenters. The majority of noise complaints received in January were regarding Alaska Airlines, propellers, and flights that were unable to be tracked.

What's Changed This Year? January 2022 vs. 2021

Airlines and Operators Identified Through Complaints

Aircraft Operated by Airlines at STS

ALASKA AIRLINES	AMERICAN AIRLINES	AVELO AIRLINES	UNITED AIRLINES
<u>E175 (76 seats)</u> 	<u>E175 (76 seats)</u> 	<u>737-800 (189 seats)</u> 	<u>CRJ200 (50 seats)</u> 
<u>Q400 (76 seats)</u> 	<u>CRJ700 (65-76 seats)</u> 		
	<u>CRJ900 (76-79 seats)</u> 		

American, Avelo, and United Airlines operate jet aircraft. Alaska Airlines operates jet and turboprop aircraft.

Identified Aircraft by Operation, Runway

Aircraft Points of Closest Approach (PCA)

There were 45 aircraft identified through complaints made this month with a tracked point of closest approach (PCA). Sometimes called the PCA slant, the PCA is the distance in nautical miles between the commenter's address and the aircraft.

In January, 27% of aircraft that generated complaints were less than a quarter-mile from the commenter's address per the PCA measurement.

Most Aircraft Were Between 0 and 0.49 Nautical Miles from the Commenter

Aircraft Altitudes

There were 41 aircraft identified through complaints made this month with a tracked altitude. At the point of closest approach to the commenter's address, the altitude was recorded (in feet) in relation to the commenters location and may be represented as a negative number due to their location being at a higher elevation than the Airport and flight paths. Per FAA aircraft guidelines, except when necessary for takeoff or landing, aircraft must maintain an altitude of at least 1,000 feet over populated areas. Helicopters may operate safely at less than the minimum for other aircraft.

Recorded Altitude Range	Aircraft	Recorded Altitude
Under 1,000 feet	11*	336, 411, 571, 611, 647, 751, 762, 777, 927, 967, 972
1,000 to 1,499 feet	12	1007, 1072, 1146, 1241, 1246, 1266, 1296, 1356, 1387, 1411, 1426, 1446
1,500 to 1,999 feet	4	1581, 1771, 1841, 1894
Over 2,000 feet	10	2271, 2346, 2421, 2471, 2991, 3177, 3358, 3601, 3745, 4081

*Aircraft under 500 feet are typically helicopters.

Aircraft Angles

What are the altitude requirements for aircraft landing at or taking off from the Airport?

The Airport's standard altitude pattern is the highest allowed by the FAA.

Under FAA regulations, altitude restrictions are not applicable during landing and takeoff. The FAA has exclusive sovereignty of airspace in the United States (49 U.S.C. Section 40103(a)).

Standard Altitude Pattern for STS

At the point of closest approach to the commenter's address, the angle was calculated. The angle of the aircraft was then categorized as lateral (0° to 30°), offset (30° to 60°), or overhead (60° to 90°).

Most Aircraft Were Lateral at the Time of Complaint

Originating Locations of Complaints

This graph reflects the locations of unique commenters this month.

Distance of Originating Complaint Locations from STS (in nautical miles)

Why are aircraft flying over my house?

The FAA directs traffic into and out of the Airport. Flights are directed to the safest pattern depending on the amount of air traffic and prevailing winds at the time of arrival or departure. Safety is the FAA's first consideration. However, aircraft can and do fly over all parts of Sonoma County. Sonoma County does not contain any No Fly Zones.

This graph reflects the distance between the Airport and the addresses of unique complainants who made complaints this month in nautical miles (NM).

Days and Times Complaints Were Generated

Day = 7:00 AM to 5:59 PM / **Evening** = 6:00 PM to 9:59 AM / **Night** = 10:00 PM – 6:59 AM

Method by Which Complaints Were Received

County Districts Complaints Were Received From*

*Supervisory districts are based on the district map located on the Sonoma County [website](#).

Year-to-Date Complaints by District

Month	District 1	District 2	District 3	District 4	District 5
January	-	-	2	29	23
