Charles M. Schulz – Sonoma County Airport (STS)

Aircraft Noise Monthly Report

November 2021

About the Charles M. Schulz – Sonoma County Airport and Noise Abatement

The Airport operates as a self-supporting Enterprise Fund within the Department of Transportation and Public Works and under the jurisdiction of the Federal Aviation Administration (FAA). STS is both a general aviation facility, serving private planes and business jets, and is a commercial airline facility with scheduled air service. STS generates over \$1,300,000 annually in tax revenues, via its users, for Sonoma County and County School Districts.

The Airport's current Noise Abatement Program was established in 1988. STS also works within FAA guidelines, to encourage pilots and airlines to fly with consideration of our neighbors in mind. The Airport makes every effort to promote flight procedures that minimize aircraft noise while always maintaining safety as the highest priority. It is the FAA's sole responsibility to develop air traffic rules, assign the use of airspace, and control air traffic.

STS is working with our Aviation Commission and a community advisory group to re-write the Airport's Noise Abatement Guide and associated procedures (to be released in early 2022). Using flight-tracking and noise management software, the Airport also provides monthly complaint reports to pilots and to airlines so that operators can use real data to update flight practices and fly friendly. As more data becomes available to STS staff, additional analysis is performed and included in monthly and annual reports.

This Month's Operations

This Month's Noise Complaints At-A-Glance

- 52 Noise Complaints received
- 21 Individual Commenters
- 10 New Commenters
- 39 Correlated Operations*
- 14 Complaints that were non-specific, were regarding operations that did not include STS as the origin or the destination (not Airport-related), or were unable to be correlated to a flight track/aircraft

**An Operation is a departure from or an arrival to the Airport. Complaints may be correlated to more than one Operation or may not be correlated to an Operation.*

The Airport received 2 less complaints in November than in October. This month, 6 of the complaints received were from 5 commenters located greater than ten nautical miles from the Airport. There were 10 new commenters this month. Four of the new commenters live in Santa Rosa, two in Sebastopol, three in Windsor, one in Cloverdale. 12 of the 21 individual commenters live within five nautical miles of STS, including 7 of the new commenters. The majority of noise complaints received in November were regarding Alaska Airlines, propellers, and flights that were unable to be tracked.

What's Changed This Year? November 2021 vs. 2020

Airlines and Operators Identified Through Complaints

American, Avelo, and United Airlines operate jet aircraft. Alaska Airlines operates jet and turboprop aircraft.

Aircraft Operated by Airlines at STS

ALASKA AIRLINES	AMERICAN AIRLINES	AVELO AIRLINES	UNITED AIRLINES
<u>E175 (76 seats)</u> 	<u>E175 (76 seats)</u> 	<u>737-800 (189 seats)</u> 	<u>CRJ200 (50 seats)</u> 
<u>Q400 (76 seats)</u> 	<u>CRJ700 (65-76 seats)</u> 		
	<u>CRJ900 (76-79 seats)</u> 		

Identified Aircraft by Operation, Runway

Aircraft Points of Closest Approach (PCA)

There were 44 aircraft identified through complaints made this month with a tracked point of closest approach (PCA). Sometimes called the PCA slant, the PCA is the distance in nautical miles between the commenter's address and the aircraft.

In November, 34% of aircraft that generated complaints were less than a quarter-mile from the commenter's address per the PCA measurement.

Most Aircraft Were Between 0 and 0.49 Nautical Miles from the Commenter

Aircraft Altitudes

There were 40 aircraft identified through complaints made this month with a tracked altitude. At the point of closest approach to the commenter's address, the altitude was recorded (in feet) in relation to the commenters location and may be represented as a negative number due to their location being at a higher elevation than the Airport and flight paths. Per FAA aircraft guidelines, except when necessary for takeoff or landing, aircraft must maintain an altitude of at least 1,000 feet over populated areas. Helicopters may operate safely at less than the minimum for other aircraft.

Recorded Altitude Range	Aircraft	Recorded Altitude
Under 1,000 feet	11*	165, 345, 381, 631, 661, 767, 817, 946, 961, 971, 981
1,000 to 1,499 feet	14	1006, 1027, 1031, 1032, 1046, 1062, 1066, 1071, 1154, 1176, 1261, 1486
1,500 to 1,999 feet	5	1541, 1836, 1856, 1885, 1986
Over 2,000 feet	10	2006, 2131, 2171, 2191, 2221, 2331, 2487, 2902, 3752, 4390

*Aircraft under 500 feet are typically helicopters.

Aircraft Angles

What are the altitude requirements for aircraft landing at or taking off from the Airport?

The Airport's standard altitude pattern is the highest allowed by the FAA.

Under FAA regulations, altitude restrictions are not applicable during landing and takeoff. The FAA has exclusive sovereignty of airspace in the United States (49 U.S.C. Section 40103(a)).

Standard Altitude Pattern for STS

At the point of closest approach to the commenter's address, the angle was calculated. The angle of the aircraft was then categorized as lateral (0° to 30°), offset (30° to 60°), or overhead (60° to 90°).

Most Aircraft Were Lateral at the Time of Complaint

Originating Locations of Complaints

This graph reflects the locations of unique commenters this month.

Distance of Originating Complaint Locations from STS (in nautical miles)

Why are aircraft flying over my house?

The FAA directs traffic into and out of the Airport. Flights are directed to the safest pattern depending on the amount of air traffic and prevailing winds at the time of arrival or departure. Safety is the FAA's first consideration. However, aircraft can and do fly over all parts of Sonoma County. Sonoma County does not contain any No Fly Zones.

This graph reflects the distance between the Airport and the addresses of unique complainants who made complaints this month in nautical miles (NM).

Days and Times Complaints Were Generated

Day = 7:00 AM to 5:59 PM / **Evening** = 6:00 PM to 9:59 AM / **Night** = 10:00 PM – 6:59 AM

Method by Which Complaints Were Received

County Districts Complaints Were Received From*

*Supervisory districts are based on the district map located on the Sonoma County [website](#).

Year-to-Date Operations and Complaints

Month	2021 Total Operations	2021 Airline Operations	2021 Complaints	2020 Total Operations	2020 Airline Operations	2020 Complaints
January	4,851	299	34	6,244	671	28
February	6,788	203	42	6,607	648	58
March	7,343	339	68	5,365	700	84
